

The BRIDE Tree

paint by number

Supplies:

- 8" x 10" canvas
- Bride Tree PDF
- graphite paper
- acrylic paint (view color chart)
- pencil
- masking tape
(small amount to hold image in place)

#1 white with 1 drop of #14	#6 mix of #5 and teal	#11	#16
#2	#7	#12	#17
#3	#8 white with a drop of #18	#13	#18
#4	#9 yellow with white	#14	Use this color to mix with #5 to make #6
#5	#10	#15	

numbered page for
painting reference

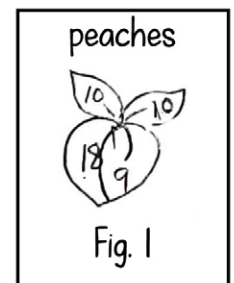

use this page to trace
on your canvas

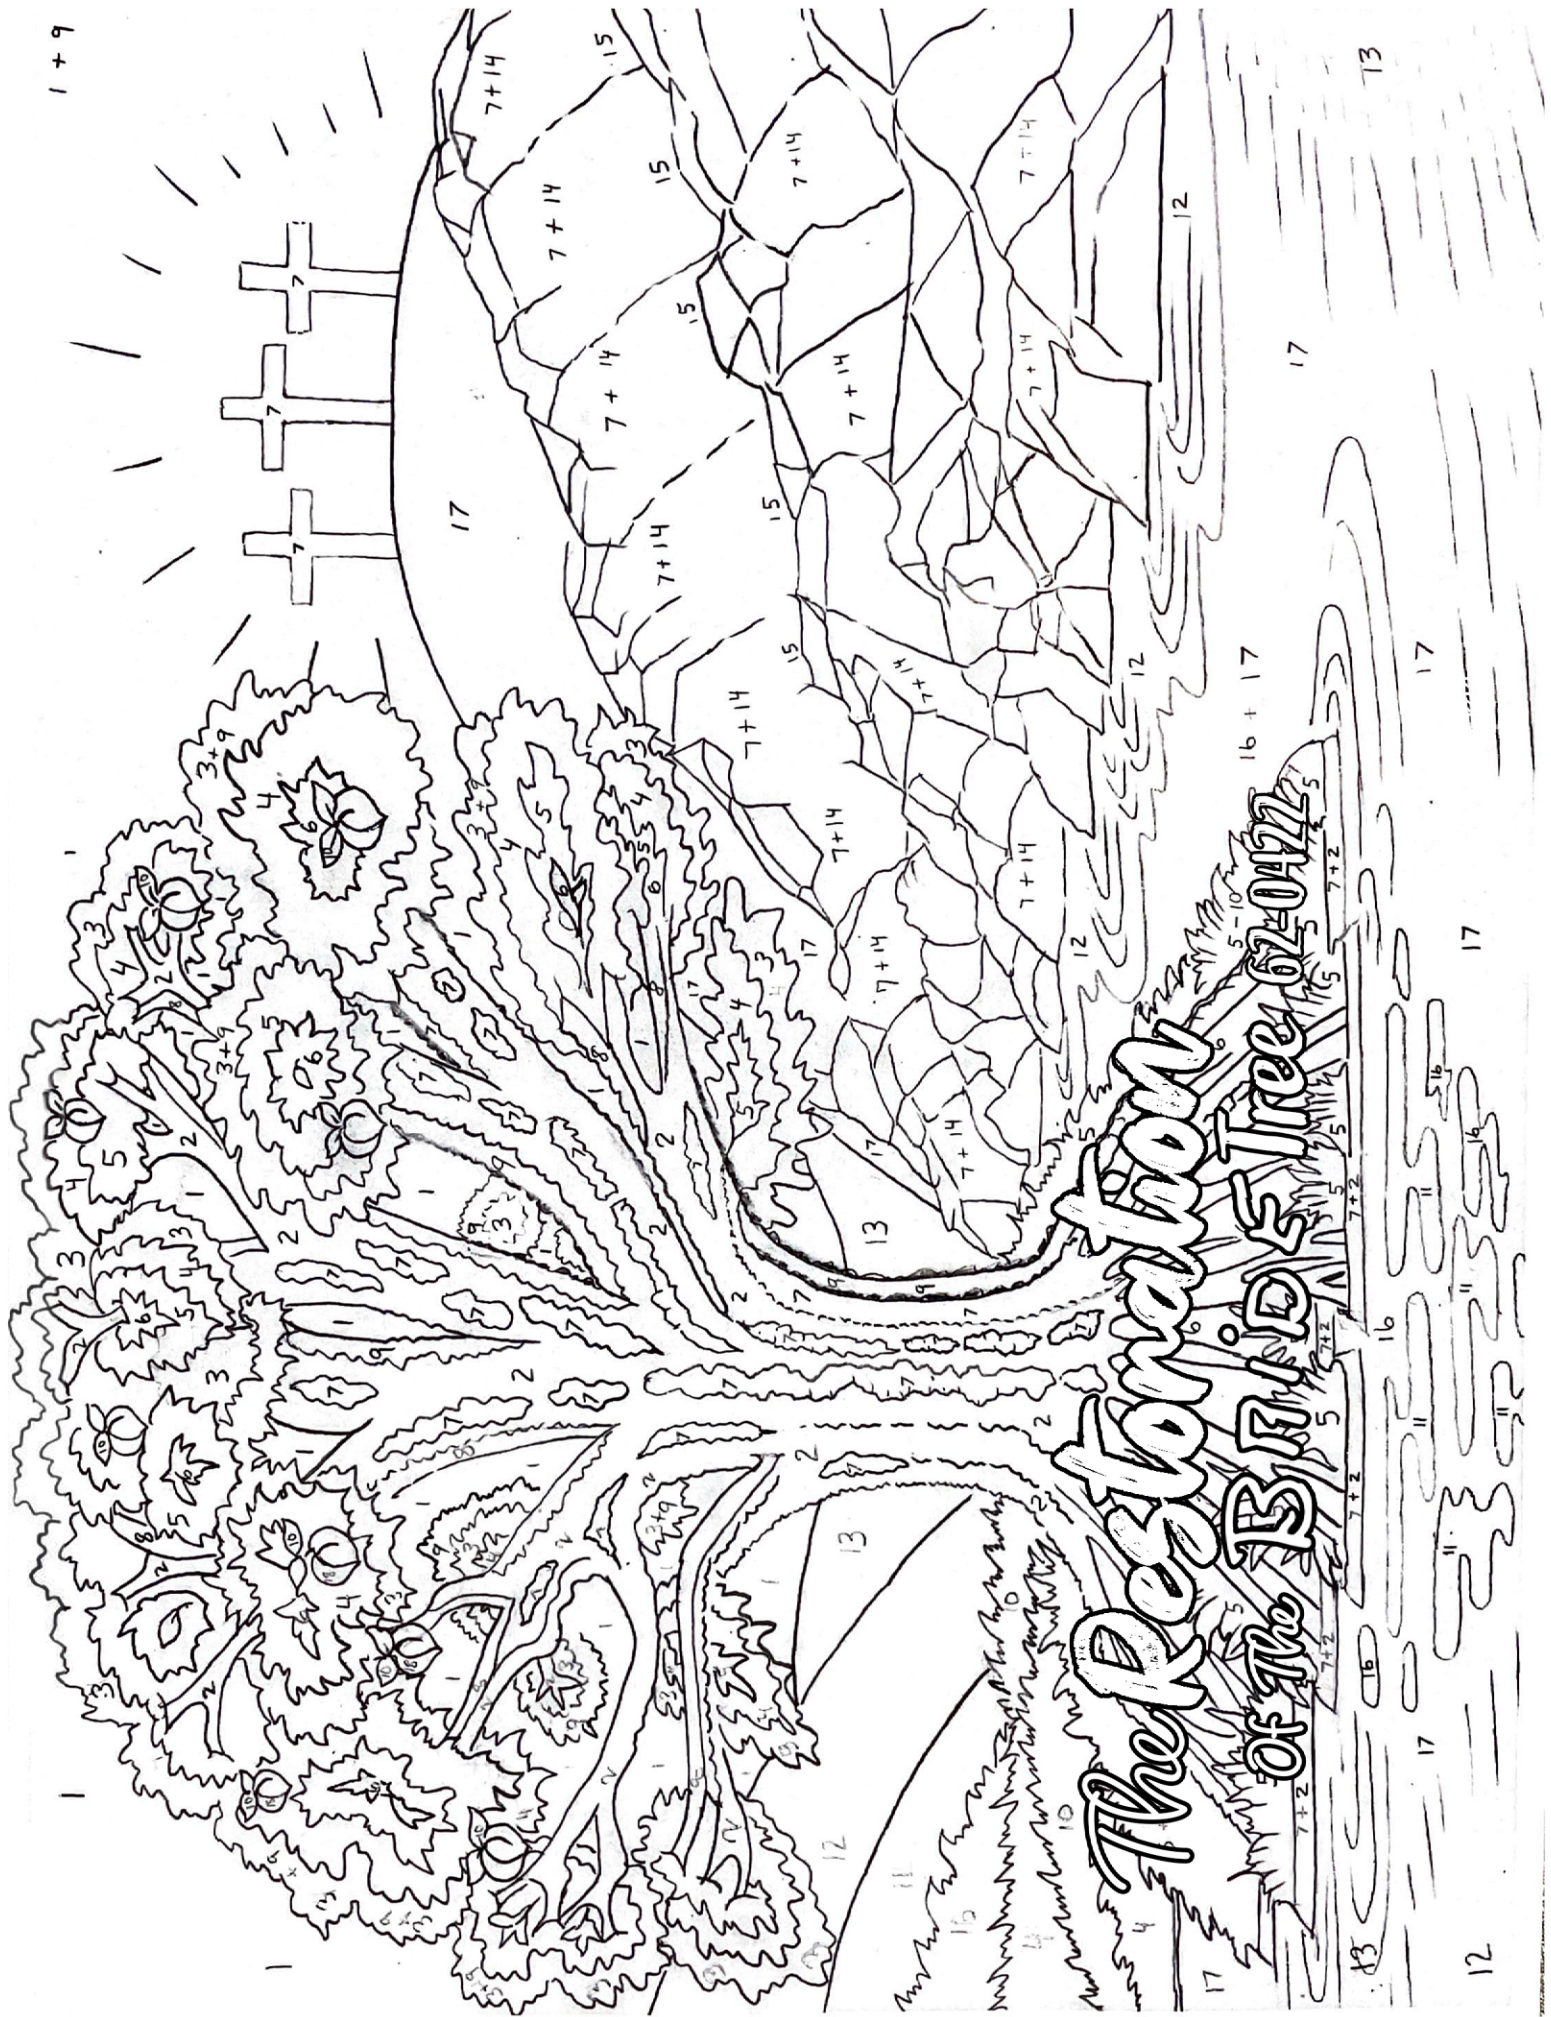

Tracing:

1. Tape graphite paper face down onto your canvas.
2. Place Bride Tree pdf overtop of the trace paper on the canvas and tape into place.
3. With a pencil trace all the lines onto the canvas. Tip: Use a colored pencil so that you know where you have traced over. The harder you press with the pencil, the darker the graphite will show up onto your canvas; so, use light-to-medium pressure when tracing the image.
4. After the image is traced, carefully remove the Bride Tree and graphite paper.
5. If you notice any extra lines you didn't mean to trace, you can try and erase with an eraser or cover them up with paint while you are painting.
6. You're ready to start painting!

Paint tips:

- Paint in the order of numbers from #1-18.
- Use a 1/2-inch flat brush to paint the sky (#1), water (#17), and the mountain rocks (#7 and #14).
- Use a very tiny brush for the tree and crosses.
- When painting the sky, paint over the top of the tree and crosses in long strokes.
- Paint the water in long straight strokes all in the same directions. You can turn your paper sideways if it helps.
- Use Fig. 1 to paint the peaches on the tree.
