Illuminated
PILLAR OF FIRE

- 8"x10" Black Foam Board
  (if using a large piece, cut to 8"x10")
  - option 1
  - option 2
- Clear Plastic Poster Board
  - option 1
  - option 2
- 7 ft. Twinkle Lights
  (any 7ft - 10ft battery operated twinkle lights will work)
  - option 1
  - option 2
- Acrylic Paint
  - White
  - Yellow
  - Orange
  - Glow-In-The-Dark Paint

- Hot Glue Gun
- Hot Glue Sticks
- Scissors
- X-ACTO Knife
- Pencil
- Paint Palette
- Paint Brush
- Water Cup
- Paper Towels
- Pillar of Fire template - cut out
- White Sticker Paper (for printable stickers)

Step 1: Place Pillar of Fire template under clear plastic sheet. Trace onto plastic with pencil and cut out.
Note: Before you start painting, make sure the Pillar of Fire cutout is facing the right direction. You will be painting the underside of Pillar of Fire.

Step 2: Paint a thin layer of glow-in-the-dark paint on plastic, focusing on the center. Allow to dry.

Step 3: Paint each section, starting with orange around the border. Paint a strip of yellow around the inner circle. Fill in the center with white paint. Allow each color to dry before going on to next color. (Use a fan for faster dry time.)
Tip: Dab paint instead of using long strokes to apply a thicker layer. You can use white to lighten your other colors if needed.

Step 4: Hot glue twinkle lights to the back of Pillar of Fire, weaving back and forth to cover the whole area.
Note: Be careful when gluing lights to Pillar of Fire, as paint is easy to scratch off.

Step 5: Attach Pillar of Fire to black foam board with hot glue.

Step 6: Add stickers to board.
